Profile

A Software Developer graduated from **Akdeniz University's English Computer Engineering** department, specializing in **C# and .NET** technologies. Currently working on the **Enerjisa project** at **Atolla Tech**, where they joined in September. Has practical experience in **ABP Framework, PostgreSQL/PgAdmin, and Visual Studio** environments.

Education

Computer Science Engineering

Akdeniz University(English)

2020 – 2025

Antalya, Turkey

Skills

React

JavaScript/TypeScript

HTML/CSS(Flexbox)

.NET

C#

Azure Services

Microservice Architecture

Azure Functions

Domain Driven Design

Entity Framework

Python

Projects

Enerjisa Project

The project heavily utilizes the ABP Framework and C#/.NET for backend logic and service development. Data persistence is managed using PostgreSQL (administered via PgAdmin),

AI Powered Chatbot

Chatbot application with ChatGPT API integration

Hotel Booking System

The project was developed using a microservices architecture. Microsoft Entra ID (Azure AD) was integrated for authentication and authorization. All services were containerized and orchestrated using Docker Compose. Additionally, a Prometheus-based monitoring infrastructure was implemented to track system performance and health.

Professional Experience

Jr. Software Engineer

Atolla Tech

2025 – present

Redeveloping the APIs of an application originally written in PHP, using modern .NET technologies from scratch.

Internship-Backend Development

C#, .NET , ABP Framework , SQL

07/2025 – 08/2025

Antalya

Internship-Frontend Development

JS-TS-React

07/2024 – 08/2024
